All values shown are for standard lift truck with standard equipment. If the truck is supplied with options, values may change. The specifications apply under normal operating conditions. All values given may vary + 5 % and - 10 % due the motor and system tolerances and represent nominal values obtained under typical operating conditions. CLARK reserves the right to change products and specifications without prior notice.

FEATURES & ADVANTAGES

WSE16/16i

Precise and powerful

- Standard proportional lift for smooth and precise lifting and lowering
- High lift speeds through powerful AC technology
- Robust mast and frame construction

Operation

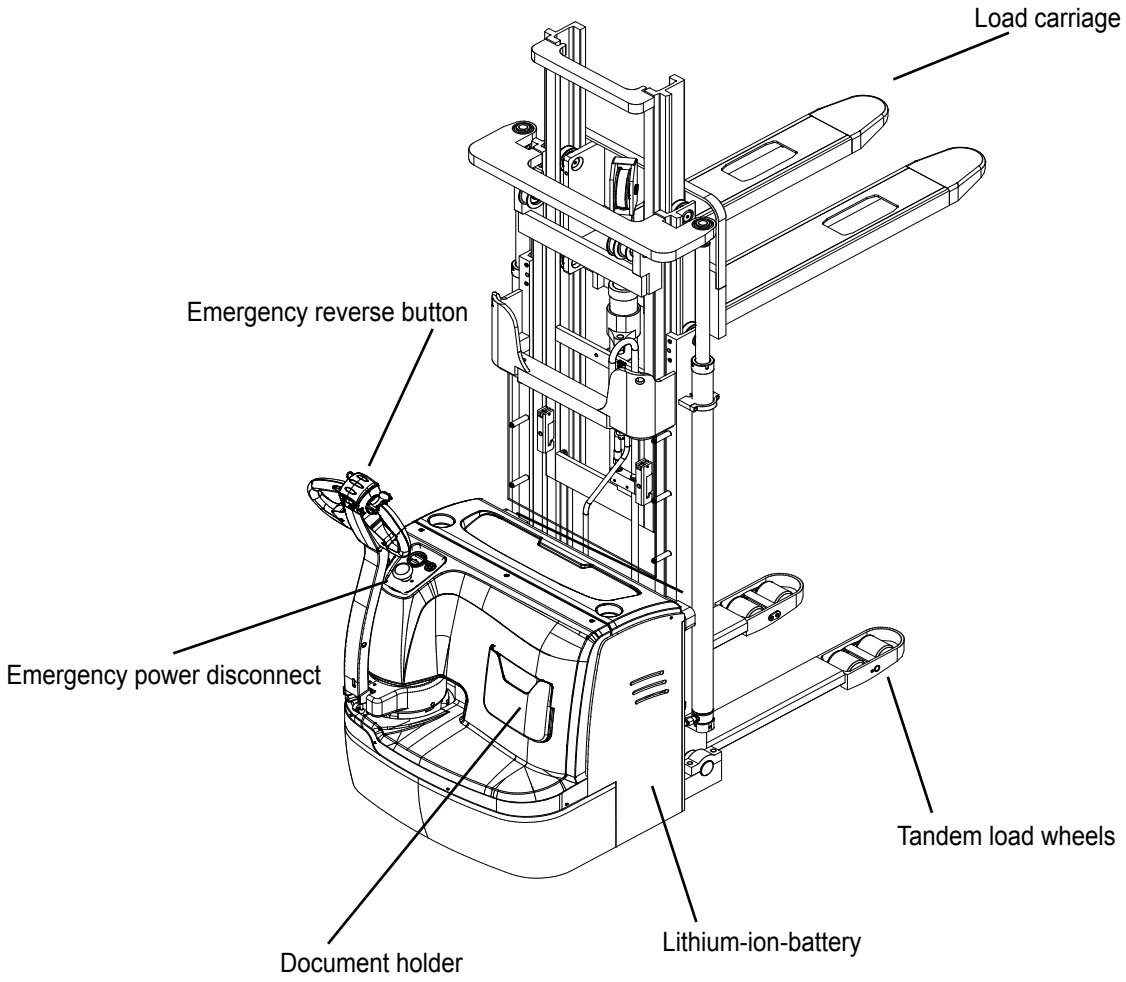

- Standard masts with free lift: 2,500–3,500 mm
- Triplex masts with free lift: 4,500–5,600 mm
- Turtle mode for controlled manoeuvring in narrow areas
- WSE16i: initial lift for increased ground clearance and double pallet transport
- Fork length options from 1070 to 1600 mm

Operator-friendly

- TFT colour display with clear operating information
- Optional equipment: PIN code activation, A4 document holder, scanner holder, Blue Light, load backrest
- Ergonomically positioned controls

Maintenance-friendly

- CAN bus technology for simple diagnostics
- Water- and dust-protected drive motor
- Excellent access to electrical and hydraulic assemblies

CLARK products, illustrations and specications are subject to change without notice. Performance may vary + 5 % and - 10 % due to motor and system effciency tolerance.

PRODUCT DESCRIPTION

WSE16/16i

Powerful and robust

The WSE16 and WSE16i models are robust electric pallet stackers for demanding industrial applications. They support fast work cycles, precise control and lift heights from 2,500 to 5,600 mm, covering a wide range of tasks in warehousing, production and logistics. Standard masts include free lift. Free lift enables the load to be lifted without changing the overall height of the truck, which is a clear advantage when working in areas with low clearance heights.

The WSE16 is the standard version without initial lift and is designed for classic storage and retrieval tasks. The WSE16i features an initial lift, providing increased ground clearance on ramps and uneven surfaces and enabling double pallet transport. This improves flexibility in the material flow.

Li-Ion Technology

The WSE16 series is available with modern lithium-ion batteries:

- 24 V / 150 Ah with external charger 24 V / 50 A (option)
- 24 V / 230 Ah with external charger 24 V / 100 A (std.)

Li-ion technology is maintenance-free and supports opportunity charging, delivering high availability for multi-shift operation. No ventilation zones or maintenance tasks such as water top-up are required.
